

Fernando Erazo

Head of Healthcare Informatics, Solutions & Services

Philips, ASEAN & Pacific

Fernando Erazo is Business Leader for Philips Healthcare Informatics, Solutions & Services (HISS) in ASEAN & Pacific and a member of Philips Healthcare regional leadership team. His portfolio includes EMR, PACS, Cardiology Informatics, Advanced Visualization Solutions, Population Health Management and more – these are Philips solutions with decades of proven value especially in Radiology, Cardiology, Oncology clinical domains and telemedicine applications for remote patient management.

Fernando's role at Philips is to partner health systems to securely connect relevant data in a seamless and clinically responsible way (both on-premises and in the cloud), helping caregivers to see what is relevant, when and where needed. At Philips, we make health data actionable, valuable for diagnostic or treatment decisions by integrating data into clinical workflows everywhere, including the patients' home. Fernando believes deeply in moving care to the home, helping people play bigger roles in managing their own health. His vision is to change the patient journey by connecting providers, patients, family, devices and data in innovative ways. This includes eliminating boundaries between hospitals and homes as well as enabling collaborations between patients and doctors to realize better clinical outcomes.

Fernando holds a double-degree in Physics & Computer Science from Knox College in Illinois, United States, as well as a Masters' of Science in Software Engineering from Groningen University, Netherlands.
